Dear Colleagues,

As the world is moving towards Open banking and API Banking, there is a significant /paradigm shift towards Cloud & Data Transformation in the banking & financial sector.

Cloud has become the preferred way to manage, store and transfer data because of its convenience, unmatched scale, and economic advantage. It has provided an opportunity for the banking sector to access an unlimited amount of customer financial data from anywhere, and interpret this data to identify new opportunities and harness it to harness the full potential.

With the rise of mobile banking, fintech, and virtual transaction services relevance of Cloud and Data has gained more momentum.

Banks are switching from their age-old legacy systems to more robust, efficient, and modernized platforms and investing heavily in digital technologies, including cloud computing, Data governance, Al, Automation, Big Data, IoT, Cyber security that can help create a hospitable environment for growth and opportunity by keeping risk at bay.

Despite the regulatory challenges, banks have recognized the importance of digital developments and are working intensively on potential solutions and strategies.

Kinfos Events are proud to launch APAC's first dedicated banking summit on "Cloud and Data Transformation". This inaugural edition will be jointly represented by some of the top banks and industry leaders. This event will help you obtain the latest insights, case studies, best practices, and key trends in Cloud Computing, Big Data, Open banking, Cyber Security, and Tokenization, etc.

Join us at the dedicated show, which will be jointly represented by 20+ leading speakers (mostly from regional banks & selected emerging FinTechs) and are expected to gather 150-200 qualified delegates.

We welcome you all to this unique show which will help us to all stay on top of the game.

Kind regards,

- Data center as a service: Exploring the challenges and opportunities
- How banks are actively involved in facilitating data center construction growth?
- Looking at the role of data center and cloud in driving digital transformation.
- Leveraging new technology such as Al, AA, ML to harness the immense potential of data?
- How advanced banking analytics is redefining the industry?
- What challenges do banks face in using a data-centric business?
- What are the major factors driving the data center construction market?
- How does Open Finance differ from Open Banking and why is it important?
- What are the biggest opportunities in open banking payments?
- What are the key considerations for financing data centers construction in banking sector?
- Future Opportunity, Considering the 3Cs of Data Centers.

Patrycja Wisniewska | COO & Product Lead | ING

Gary Lam | Chief Technology Officer | Livi Bank

Vishesh Gupta | Head of APAC TMT, Healthcare | Sumitomo Mitsui Banking Corporation

Izzat Aziz | Director of Technology, Risk and Cybersecurity | KPMG (Moderator)

Cloud Governance as an Enabler to Accelerate Enterprise Cloud Adoption 11:10

 Cloud Governance is not only about control, but it can also be used to enable and accelerate enterprise cloud adoption too. Let us explore how it can be done.

Pirapat Phongpatanakijchote | Head of Cloud Center of Excellence | SCB

11:30 Deliver with Cognitive in the mind

- Void, Journey and understand data biased.
- Journey to a data driven Organization
- Combine Analytics with Cognitive and automation

Luis Carlos Cruz Huertas | SVP, Head of Infrastructure - BigData, Group Consumer Banking & Big Data Analytics Technology | DBS Bank

11:50 Robust Data Governance

- How companies are maximizing big data benefits with data governance?
- Key considerations –
- 1. Such as ownership of the data,
- 2. The need for different departments to access information
- 3. Growing adoption of big data technologies and big data analytics applications.
- What are the key steps to building a data governance program?

Krista Bell | Sr. Manager, Data Governance | Beyond Bank Australia

Networking & Coffee Break 12:10

SESSION 2

Building blocks for analytics driven, real time digital marketing in banking

The keynote will discuss common challenges in campaign management practices today in banks; talk about building blocks that banks should invest in that allow algorithm driven, real time, personalized marketing offers using first party customer

Deepak Mathur | ED, Analytics & Digital Marketing Transformation | UOB

Building a Neo Bank in 12 months 12:45

- Neo Banking Strategy
- · How to build a bank in 12 months

Arivuvel Ramu | Group CTO | Tonik Bank

13:05 Cloud Agility "Addition to Business Value"

- What are the emerging opportunities of Cloud Agility for banks?
- · Challenges faced by large financial firms on prioritizing Cloud Agility.
- How Cloud Computing and Data Transformation helps in achieving future business agility?
- · Impact of Customer agility with cloud on financial institutions?

Poubarlen Narrainen | Sub Team Lead , Cyber & Information Security | SBM BANK (MAURITIUS) LTD

13:25 **Conference Chair's Closing Remarks**

Izzat Aziz | Director of Technology, Risk and Cybersecurity | KPMG
